ABOUT

Software Engineer with 3+ years of industry experience developing web and mobile applications using React.js, React Native, JavaScript, and Java. Experienced in building responsive user interfaces, integrating REST APIs, and developing real-time application features. Familiar with backend development, SQL databases, and object-oriented programming.
An MSc Computer Science graduate from the University of Hertfordshire, with an academic and project background in Python, natural language processing, machine learning, and AI-driven candidate ranking systems. Passionate about writing clean, maintainable code and building reliable software that solves real-world problems.

EDUCATION

University of Hertfordshire(United Kingdom) **London, UK**
MSc in Computer Science *(Sept 2025 – Sep 2026)*
Key Modules: Programming and Program Design (A), Multi-User Database Systems(B+), Computer Architectures (A,), Computer Science Masters Project(B+).

University of Sri Jayewardenepura **Colombo, SriLanka**
BSc in Science-Applied Science *(Jan 2019 - April 2022)*

Jaffna Hindu College **Jaffna,Sri Lanka**
GCSE A levels- (Chemistry A, Physics -B, Maths -A) *(Aug 2017)*

TECHNICAL PROJECTS

SwiftBot Autonomous Robotics Project *Jan, 2026*
- Programming a Swiftbot to execute autonomous tasks, including real-time object detection and navigation
- Applying Java programming logic to interface with hardware sensors and manage robotic movement.

OH! Ride – Taxi-Hailing Mobile Application *February, 2024*
- Contributed to the frontend development of a taxi-hailing mobile application that connects passengers with drivers. Worked on mobile user interfaces and integration with application APIs to support ride booking and real-time functionality.
  Technologies: React Native, REST APIs, Kafka, Springboot

Mave 360 — Business Messaging & Cashflow Platform
- Contributed to the frontend of a business communication platform combining real-time messaging with cashflow-related features. Focused on user-facing functionality and integrating frontend components with application service
  Technologies: React Native, Websocket

Hertshire — AI-Powered Recruitment Platform *March, 2026*
- Developed an AI-assisted recruitment project that evaluates and ranks candidates against job requirements. Compared TF-IDF matching with Sentence Transformers and incorporated GitHub-based technical evidence. Evaluated ranking behaviour through evidence weighting, ablation studies, and sensitivity analysis.
  Tools: Python, Scikit learn, Pandas, Matplotlib

House Price Prediction Model (ranked top 15%) *April, 2024*
- Participated in Kaggle's Housing Price Prediction Competition, utilising deep learning techniques
  Tools: Python, TensorFlow, Pandas and Data Visualisation Libraries

EXPERIENCE

Nextgen Innovations – Hybrid **Srilanka**
Software Engineer *2023 Nov — 2025 Dec*
- Contributed to frontend development for OH! Ride, a taxi-hailing mobile application, and Mave 360, a business messaging and cashflow management platform.
- Developed and enhanced user interfaces using React.js and React Native.
- Integrated frontend components with REST APIs and supported real-time application functionality.
- Focused on responsive design, usability, and maintainable frontend code.

Samuel Gnanam IT Centre (SGIC) **Srilanka**
Junior Software Engineer **Dec 2022 – Oct 2023**

- Built foundational experience in software engineering and backend development using Java.
- Developed knowledge of object-oriented programming, application logic, and database fundamentals.
- Strengthened understanding of backend architecture and API development.

Marks & Spencer **London**
Operational Partner ***Nov 2025 – Apr 2026***

- Streamlined backend operations, managed inventory, and supply processes for an efficient retail environment. Collaborated with teams to meet delivery targets during high-demand periods.

SKILLS

- **Programming:** React-Native **,** SQL, Python, Java, API Integration, TensorFlow, Pandas, Scikit-learn, NLP
- **Tools & Technologies:** Git, Azure, MySQL, Power BI, Jupyter Notebooks, Kaggle, Data Visualization
- **Soft Skills:** Team Leadership, Communication, Analytical Thinking, Problem Solving
